Entry-level choice for night vision

Unlimited New View

Background and Development

Background

Most crimes happen at night because of the ultra-low light environment provides a very favorable circumstance for criminals.

The key information about vehicles, such as plate number, color and brand of a vehicle, may be useful for police or other people in need.

Traditional network camera (Without IR): The images shot by traditional cameras with normal mode are too dark to get useful information.

Traditional camera (IR mode): Traditional cameras apply IR mode to improve image quality in the low-light night. However, people still can not obtain the color information from images.

Easystar camera: Easystar cameras deliver the colorful & bright image with the complete information.

	Traditional Network Camera (Without IR)	Traditional Network Camera (IR Mode)	Easystar Network Camera
Image quality	■ Blurred, dark	■ Clear, black and white	■ Colorful, bright
Information	■ Get few useful information	■ Unable to get color information	■ Get the complete information

Easystar is here for you

In 2019, Uniview, launched a brand-new EasyStar camera series. The EasyStar series belongs to Easy series which targets the entry-level surveillance market with incredible starlight-level imaging performance and attractive price.

They are capable of presenting high definition and colorful starlight-level images. In addition, the ultra long night IR distance that up to 50 meters (bullet models only) offers the best user experiences. Besides, the 4MP models support WDR that ensures excellent image quality in the significant foreground and background illumination difference.

The EasyStar cameras are the best choices if you seek for entry-level products with great night vision.

<p>Entry-level choice for low-light</p> <p>Nice balance between the performance and price. Entry-level choice for night monitoring.</p>		<p>Min illumination: 0.0005lux</p> <p>Excellent performance in low-light environments. Colorful image at the minimum illumination of 0.0005 Lux.</p>
<p>BSI sensor</p> <p>Backside-illuminated CMOS sensor, more sensitive to the light.</p>		<p>Long IR distance</p> <p>Provide visibility in 0 lux environment. Supports up to 50 meters IR (Bullet only).</p>

Image Performance

Indoor image performance

Radically reduce the blurring, deliver a clear, bright and colorful image.

Traditional Network Camera	EasyStar Network Camera
	
	EasyStar products provide bright and color details

Outdoor image performance

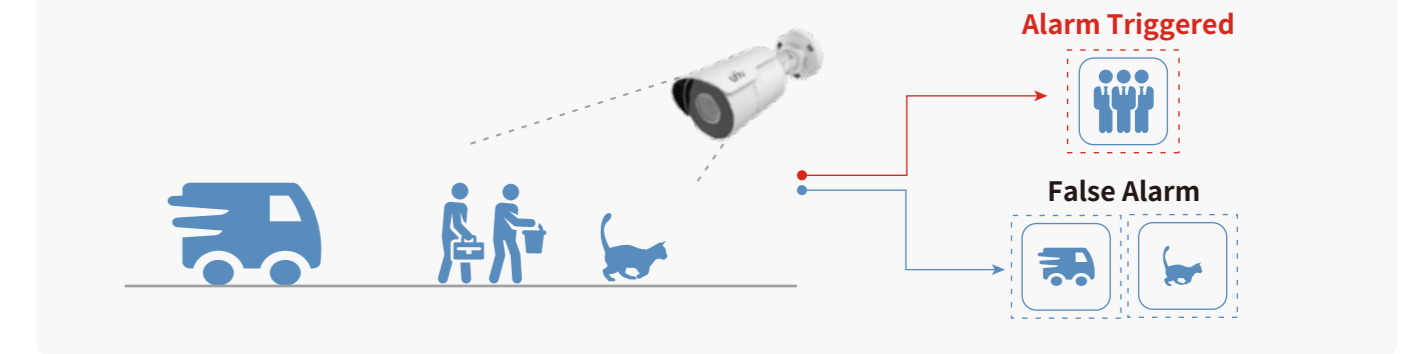

Brilliant performance in the low-light outdoor environment
